Summary

A self-taught programmer and a passionate front-end developer. Javascript enthusiast who prefers the React ecosystem for front-end development, but isn't afraid to learn and apply other technologies as needed. When creating new code, make sure to follow the best coding structures and construct maintainable codebases. In my spare time, I enjoy solving problems on online judges. I have solved almost 150 programming problems in various online judges.

Skills

Language:

- C Programming Language, Javascript, ES6, ES7

Frontend Technologies:

- React, Context API, Hooks, Html5, Css3, Sass.

Backend Technologies:

- Node js, Express, MongoDB, JSON.

Tools:

- React-Router-Dom, React-Hook-Forms, Redux, Git-Github, NPM, Material UI, Chakra UI, Bootstrap, TailwindCss.

Interpersonal:

Enjoy working with details and completing assignments accurately on time. I consider myself a team player, quick learner, and problem solver.

Extra-Curricular Activities

Solved almost 150 Problems in various online judges. Solved 115 Problems in [URI online Judge](#) with C Programming Language.
